Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/541,014	Applicant(s) LEE, DONG SEON	
	Examiner ANDREW W. SUTTON	Art Unit 3765	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 28 June 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Drawings

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: 30. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim1 is rejected under 35 U.S.C. 102(b) as being anticipated by Hetzel (US 6,098,197). Hetzel teaches a liner 18 made of a thermoset material, which has an opening in its lower portion in order to allow a user's head to be put into the safety

helmet with the outside of the liner cover being covered with a nonwoven fiber sheet 16, prepared with a mold 36 having a concave surface and disposing the liner in the mold 36 such that the fibers 16 are disposed between the liner 18 and the mold. Upon compression of the mold, some of the thermoset of the inner liner 18 will inject itself between the inner liner 18 and the mold, intermingling with the fibers 16

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hetzel (US 6,098,197). Hetzel teaches a liner 18 made of a thermoset material, which has an opening in its lower portion in order to allow a user's head to be put into the safety helmet with the outside of the liner cover being covered with a nonwoven fiber sheet 16, prepared with a mold 36 having a concave surface and disposing the liner in the mold 36 such that the fibers 16 are disposed between the liner 18 and the mold. Upon compression of the mold, some of the thermoset of the inner liner 18 will inject itself between the inner liner 18 and the mold, intermingling with the fibers 16. Hetzel does not teach the use of a pad on the helmet. Grilliot teaches pads 50 being placed on the inner portions of the helmet. It would have been obvious to one of ordinary skill in

the art to modify the invention of Hetzel to provide the pads of Grilliot to provide a more comfortable helmet.

As to claim 2, the device of Grilliot has a plurality of heat supports 50 extending towards the inner space to contact the wearer.

As to claim 3, the back pad 50 of Grilliot has a round shape and the rear lower portion of the pad would have a declining forward shape from the back rim of the opening.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See form PTO-892.
